

網站資源創作比賽 06/07

組別：初中組（中一至中三）

作者：陳婉婷、張雅斯、朱穎銘、鄧朗天、黃彥榮

就讀學校：瑪利諾神父教會學校

題目：《摺紙術》

獎項：銀獎

評判對作品的評語：

李健賢教授：

The idea of linking origami with mathematics is interesting. You gave a proof. Why is the proof necessary since you seemed to have described how to do the folding earlier?

張家麟博士：

This lucid exposition of Origami is structured and concise. Interesting examples are used to illustrate how the Huzita-Hatori Axioms can function. However, one would expect more explanations for the meaning of the Axioms and the Kawasaki's Theorem.
